Notes:

1. Unicode is supported; see [help unicode advice](#).
2. Maximum number of variables is set to 5,000 but can be increased; see [help set_maxvar](#).

```
1 .
2 .
3 .
4 . import delimited "/Users/williamschlickemaier/Library/CloudStorage/Box-Box/Articles/Cohort Survey Study/cohortsurvey2.csv"
   (encoding automatically selected: UTF-8)
```

Note: Unmatched quote while processing row 116; this can be due to a formatting problem in the file or because a quoted data element spans multiple lines. You should carefully inspect your data after importing. Consider using option bindquote(strict) if quoted data spans multiple lines or option bindquote(nobind) if quotes are not used for binding data.

Note: Unmatched quote while processing row 120; this can be due to a formatting problem in the file or because a quoted data element spans multiple lines. You should carefully inspect your data after importing. Consider using option bindquote(strict) if quoted data spans multiple lines or option bindquote(nobind) if quotes are not used for binding data.

(39 vars, 130 obs)

```
5 . crosstab
   command crosstab is unrecognized
   r(199);
